I noticed back in the day when the masters rom froze when I looked at the settings. It also likes to freeze when I tricera head fossil cleaning tutorial at the beginning of the game. I saw that other people had the same problem. I used this YouTube video to help. To be honest, it's probably dated, but it worked for me. As well as warnings, the graphics on the emulator I used for the champions are not as good as the graphics on my other emulator. It also slightly distorts sound effects and makes FMV cutscenes snap crackling and pop. Plus, the tutorial itself plays music. Music with naughty Nigo words. Play music in public at your own risk.
